

FOR IMMEDIATE RELEASE

New Workshop From SecOps Cyber Institute Helps Government Contractors Achieve Compliance

NIST compliance workshop will review best practices to securing network infrastructure and review protocols for specific regulations such as HIPAA or FISMA.

Indianapolis, IN, September 10, 2019 – SecOps Cyber Institute™, the next evolution in cyber security training, will be presenting an educational cyber security workshop titled “NIST Compliance - How To Be Successful and Secure.” The workshop is being held in conjunction with the Procurement Technical Assistance Center (PTAC) of Indiana.

National Institute of Standards and Technology (NIST) guidance provides the set of standards for recommended security controls for information systems at federal agencies. Every company that obtains a government contract needs to comply to NIST. The initial benefit of NIST compliance is that it helps to ensure an organization’s infrastructure is secure. NIST also lays the foundational protocol for companies to follow when achieving compliance with specific regulations such as HIPAA or FISMA.

This workshop will help organizations better understand and work within the NIST Cybersecurity Framework. It will also review components, functions and benefits of the framework. At the conclusion of the workshop participants will receive a certificate of completion from SecOps Cyber Institute that may be used in bid contracts and proposals to help organizations stand out from their competition.

The workshop is free and will be held at two separate times on September 20, 2019. Seating is limited to the first 25 people that pre-register. Details of the event are as follows:

- **Title:** 2019 PTAC Cybersecurity Workshop: NIST Compliance - "How To Be Successful and Secure"
- **Location:** Indiana Government Center South, Conference Room D, 302 W. Washington Street, Indianapolis, IN 46204
- **Date:** Friday, September 20, 2019
